EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Kirsten Gruneberg on March 28, 2006.

The application has been amended as follows:

Please cancel claims 9-11.

These claims continued to recite the same invention on which the previous prior art rejection had been founded. Applicant indicated they were amenable to their cancellation,

Allowable Subject Matter

Based on an indication of allowable subject matter in claim 12, Applicant has amended claim 1 to include the limitations of claim 12. Accordingly, the rejections over *Okami et al.* are hereby withdrawn.

In an updated survey of the prior art, the Examiner discovered two references disclosing inventions that appeared to bear some resemblance to that presently claimed.

JP 52-102678 discloses a laminated product comprising two layers of silicone rubber containing heat-conducting filler therein sandwiched around a layer of insulating plastic film. However, a verbal translation provided to the Examiner indicated there was no mention of the type of curing mechanism employed in forming the silicone rubber layers. The Examiner could not immediately conceive of why it would have been obvious to use peroxide-cured silicones for the two outside layers, especially because peroxides often have to be decomposed into radical species at temperatures potentially deleterious to the central plastic film.

The abstract for JP 1-173514 describes a mesh shaped electrically-insulating layer onto which a silicone rubber layer containing thermoconductive filler particles is applied on one or both faces. A written translation of this document states that the middle mesh-shaped layer is one comprised of glass whereas the present claims require a synthetic resin film. Therefore, this reference also fails to anticipate/render obvious the claimed invention.

The references cited during this prosecution represent, in the Examiner's estimation, the most germane prior art known. Insofar as they fail to even render obvious the instant invention, claims 1-11, and 13-19 are allowable.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
